

The State of HTML5 Development in the Enterprise

**Sencha surveyed a sample of 2,128
business application developers.**

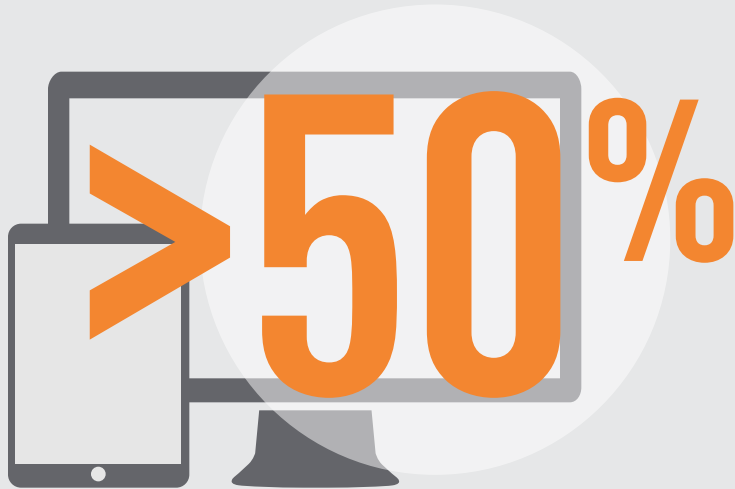

The results were surprising...

The background of the slide is a dark gray color, overlaid with a repeating pattern of white-outlined icons representing various electronic devices. These icons include desktop monitors, laptops, tablets, and smartphones, arranged in a scattered, non-uniform manner across the entire surface.

Result 1:
**Multi-device app development
is the new standard.**

THE NUMBER OF DEVICES
THE MEDIAN DEVELOPER
SUPPORTS

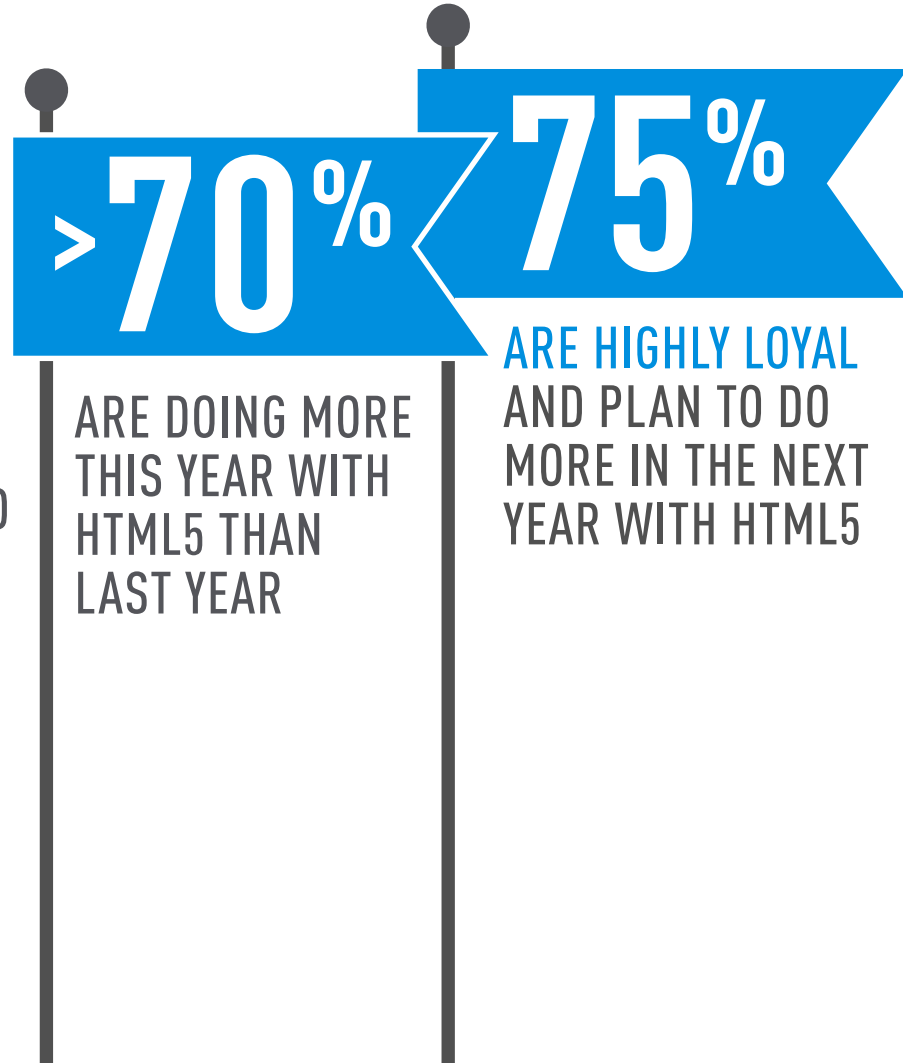

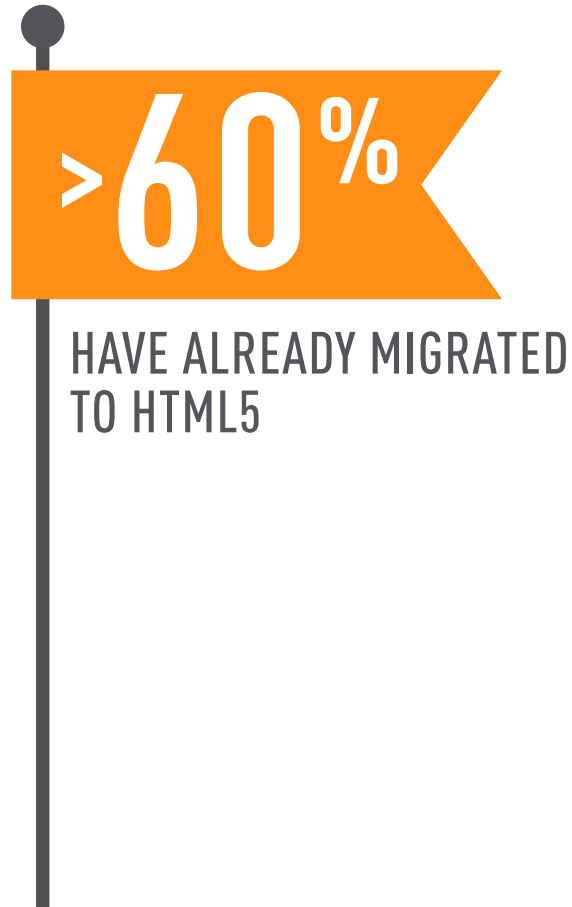

SUPPORT MOBILE
AND DESKTOP

Result 2:
**A majority of developers have
migrated to HTML5.**

HTML5 developers are more loyal than native developers

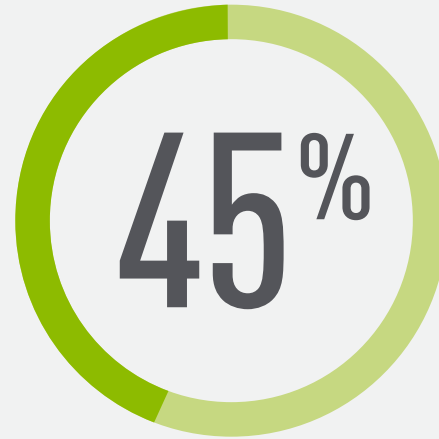

Result 3:

Windows is losing support.

30%

DROPPED SUPPORT
FOR WINDOWS DESKTOP

CLAIMED THEY SUPPORTED
WINDOWS PHONE

ACTUALLY TESTED THEIR APPS
ON WINDOWS AND TABLETS

Result 4:

There is a strong preference for standards-based technologies

CSS
JAVASCRIPT
HTML5

DEVELOPERS SHOWING HIGH INTEREST

ECMASCRIPT

TYPESCRIPT

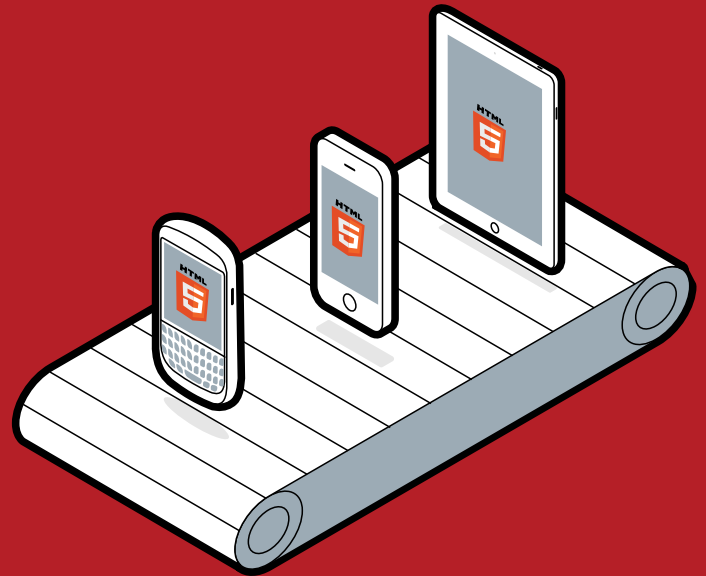

DART

NEXT GENERATION JAVASCRIPT (ECMASCRIPT 6+)
SOUNDLY BEATING TYPESCRIPT AND DART

NOT FAMILIAR WITH OR
HAD NO INTEREST IN DART

60%

Result 5:
HTML5 is thriving.

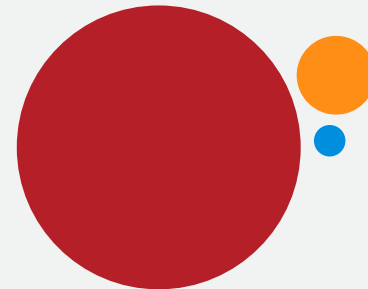

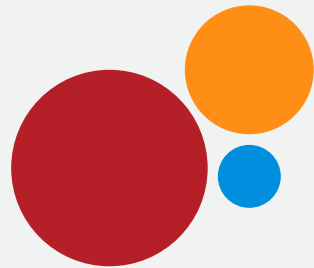

WILL YOU DO MORE, LESS OR ABOUT THE SAME AMOUNT OF WORK IN YOUR CHOSEN TECHNOLOGY?

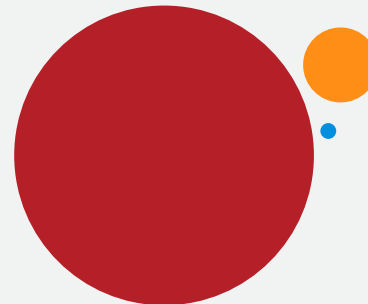

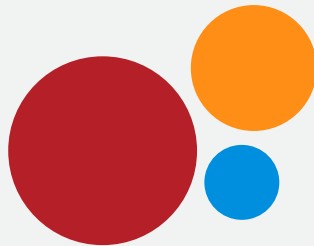

NATIVE APP DEVELOPERS

HTML5 APP DEVELOPERS

THIS
YEAR

NEXT
YEAR

■ MORE WORK

■ ABOUT THE SAME

■ LESS WORK

THE TIME IS NOW.
